PROFESSIONAL SUMMARY

Frontend Product Engineer with 4+ years owning production frontend systems end-to-end – from requirements and architecture through implementation, deployment, and maintenance. Owned the frontend for SaaS marketplaces, ERP platforms, real-time workflow tools, and payment-integrated products, taking features from client requirements through production release in close collaboration with backend teams. Strong in React, Next.js, TypeScript, and Angular, with production experience across authentication/RBAC, Stripe and Razorpay payments, Web Socket-driven real-time UIs, and dashboard-heavy product interfaces.

SKILLS

Frontend

React.js, Next.js, TypeScript, JavaScript (ES6+), Angular, HTML5, CSS3, Tailwind CSS, shadcn/UI, PrimeNG, Recharts, Chart.js

Mobile

React Native, Ionic, Cordova

Backend & APIs

REST APIs, Axios, WebSockets, Node.js (API Integration), Spring Boot (Backend Collaboration)

State & Forms

Context API, React Hook Form, Zod

Payments & Authentication

Stripe, Razorpay, JWT, OTP Authentication, RBAC

Tools & Testing

Git, GitHub, Postman, Figma, VS Code

AI & Productivity

Claude API, Prompt Engineering, Claude Code, Cursor, GitHub Copilot, AI-assisted Development

EXPERIENCE

Software Engineer – Frontend

Code Stream Technology Pvt Ltd

📅 12/2021 - Present 📍 Hyderabad, India

- Owned frontend architecture and end-to-end delivery across multiple client-facing applications, turning business requirements into shipped features through direct work with clients and backend engineers.
- Shipped and maintained 5 production web applications across SaaS platforms, ERP systems, marketplace products, and admin dashboards, built 8+ business websites, worked on 4 mobile applications (React Native, Ionic/Cordova) and 3 internal prototypes, and built reusable frontend components that improved consistency and maintainability across products.
- Implemented Stripe (ProCoach) and Razorpay (KhetiValah) payment flows, and built authentication and role-based access control (RBAC) across multiple products.
- Investigated and resolved production issues, maintained existing modules alongside new feature work, and made frontend architecture decisions to keep codebases scalable as products grew.
- Collaborated closely with backend, design, and product stakeholders in an Agile workflow, scoping features, converting designs into responsive, cross-browser interfaces, and owning releases through deployment.

KEY PROJECTS

Coaching Marketplace Platform

Tech: Next.js · TypeScript · Tailwind · ShadCN · Stripe · Spring Boot

- Delivered the frontend for a coach-learner marketplace, designing learner and coach dashboards and a reusable component system to support program discovery, enrollment, and scheduling.
- Designed the authentication/RBAC layer and integrated Stripe payment workflows end-to-end, including error handling and loading states, working directly with the client on requirements and with backend engineers on API design.
- Standardized frontend architecture and state-management patterns to keep the dashboard and enrollment flows maintainable as new features were added.

Agriculture Marketplace Platform

Tech: React · TypeScript · Tailwind CSS · Razorpay · REST APIs (Spring Boot backend)

- Built the frontend for a multi-role agricultural marketplace and event booking platform serving vendors, sponsors, farmers, buyers and participants, covering listings, stall booking, participant registration and role-based workflows.
- Implemented Razorpay checkout with payment-state handling and retry UI, GST billing and invoice interfaces, and OTP authentication with role-based routing.
- Developed the vendor product catalog, Early Bird Offers and Stand Types modules, integrating marketplace and event REST APIs across booking, payment and order flows.
